RESPONSE TO RESTRICTION REQUIREMENT

In response to the Restriction Requirement mailed on October 27, 2005,
applicant elects with traverse the invention of Group I, claims 1-23.

In the Restriction Requirement, it is contended that the inventions of claims 1-23 and claims 24-33 are related as sub-combinations that are usable together in a single combination. However, claims 1-23 do not define one invention that is usable with a second invention defined by claims 24-33. Claims 1-23 and claims 24-33

define the same invention, not two sub-combinations that are combined together as contended in the Restriction Requirement.

Referring to claim 1, it is seen that the claim describes a forward wing and a rearward wing that are connected together with there being an opening between the forward wing and the rearward wing. This is the same basic invention defined by claim 24.

Because claims 1-23 and claims 24-33 are directed to the same basic invention and are not directed to two separate sub-combinations that are usable together as a single combination as contended in the Restriction Requirement, the Restriction Requirement should be withdrawn and all of the claims 1-33 of the application should be examined on their merits.

Respectfully submitted,

Thompson Coburn LLP
